

The policy framework describes the essential criteria for how a school can meet the needs of children and young people with long-term conditions. It is in line with DfE statutory guidance on Supporting Pupils with Medical Conditions (2014) for governing bodies of maintained schools and proprietors of academies in England

St Paul's C of E Primary School, Chipperfield

SUPPORTING PUPILS WITH MEDICAL CONDITIONS POLICY

The named member of school staff responsible for this medical conditions policy and its implementation is:

NAME.....Eilish Bateman

ROLESENCO

DfE guidance

Governing bodies should ensure that all schools develop a policy for supporting pupils with medical conditions that is reviewed regularly and is readily accessible to parents and school staff.

Governing bodies should ensure that the arrangements they set up include details on how the school's policy will be implemented effectively, including a named person who has overall responsibility for policy implementation.

Details should include:

- who is responsible for ensuring that sufficient staff are suitably trained,
- a commitment that all relevant staff will be made aware of the child's condition,
- cover arrangements in case of staff absence or staff turnover to ensure someone is always available,
- briefing for supply teachers,
- risk assessments for school visits, holidays, and other school activities outside of the normal timetable,
- monitoring of individual healthcare plans.

St Paul's is an inclusive community that supports and welcomes pupils with medical conditions. It will:

- Provide children with medical conditions with the same opportunities and access to activities as all other pupils.
- Not deny admission or prevent a child from taking up a place because arrangements for their medical condition have not been made.
- Listen to the views of pupils and parents/carers.
- Help pupils and parents/carers feel confident in the care they receive and feel the level of that care meets their individual needs.
- Ensure staff understand the medical conditions of pupils and that they may be serious, adversely affect a child's quality of life and impact on their ability and confidence.
- Ensure all staff understand their duty of care to children and young people and know what to do in the event of an emergency.
- Make sure the whole school & local health community understand and support the medical conditions policy.
- Understands that all children with the same medical condition will not have the same needs, our school will focus on the needs of each individual child.
- Recognise its duties as detailed in Section 100 of the Children and Families Act 2014. (Other related legislation is referenced in DfE guidance p21). Some children with medical conditions may be considered to be disabled under the definition set out in the Equality Act 2010. Where this is the case, this school complies with their duties under that Act. Some may also have special educational needs (SEN) and/or an Education, Health and Care (EHC) plan which brings together health and social care needs, as well as their special educational provision. For children with SEN, this policy should be read in conjunction with the Special educational needs and disability (SEND) code of practice and our SEN policy.

This school's medical conditions policy is drawn up in consultation with a wide range of local key stakeholders within both the school and health settings.

- Stakeholders include pupils, parent/carers, school staff, governors, and relevant local health specialist services.
- Pupils, parent/carers, relevant local healthcare staff, and other external stakeholders are informed of and reminded about the medical conditions policy through clear communication channels.
- A clear communication plan for staff, parent/carers and other key stakeholders ensure the policy's full implementation.

All staff:

- Are trained in what to do in an emergency for children with medical conditions at this school.
- All staff, including temporary or supply staff, are aware of the medical conditions at this school
- All staff receive training in what to do in an emergency and this is refreshed every two years. School nurses will provide annual training for common conditions eg asthma, allergies, epilepsy and diabetes.¹

¹ For pupils requiring insulin injections/insulin via pumps or blood glucose monitoring in schools the Paediatric Diabetes Team will provide this level of training and education.

- All children with medical conditions that are complex, long-term or where there is a high risk that emergency intervention will be required at this school have an individual healthcare plan (IHP), see Appendix 3, which explains what help they need in an emergency. The IHP will accompany a pupil should they need to attend hospital. Parental permission will be sought and recorded in the IHP for sharing the IHP within emergency care settings.
- All staff will have received suitable training and ongoing support to ensure they fulfil the requirements set out in the pupil's IHP. This should be provided by the specialist nurse/other suitably qualified healthcare professional and/or parent/carer. The specialist will confirm their competence and this school keeps an up to date record of all training undertaken and by whom.
- This school has chosen not to hold an emergency salbutamol inhaler for use by pupils.
- This school has a defibrillator and have regular training in how to use it.
- If a pupil needs to attend hospital, a member of staff (preferably known to the pupil) will stay with them until a parent/carer arrives, or accompany a child taken to hospital by ambulance.

Administering medication at school.

- This school understands the importance of medication being taken and care received as detailed in the pupil's IHP.
- Medication will only be administered when it would be detrimental to a child's health or school attendance not to do so.
- This school will make sure that there are sufficient members of staff who have been trained to administer the medication and meet the care needs of an individual child. This school's governing body has made sure that there is the appropriate level of insurance and liability cover in place.²
- This school will not give medication (prescription or non-prescription) to a child under 16 without a parent's written or verbal consent.(see Appendix 4)
- When administering medication, for example pain relief, this school will check the maximum dosage and when the previous dose was given. Parents/carers will be contacted prior to administration.
- This school will make sure that a trained member of staff is available to accompany a pupil with a medical condition on an off-site visit, including overnight stays.
- Parents/carers at this school understand that they should let the school know immediately if their child's needs change.
- If a pupil misuses their medication, or anyone else's, their parent/carer is informed as soon as possible and the school's behaviour policy procedures are followed.

² For school's covered by HCC's insurance where an IHCP is in place; parents have consented for the school to administer medication / meet other support needs as part of that plan; trained staff undertake these support needs and record keeping in relation to administration is robust then liability cover would be in place for common treatments administered by staff. (e.g. in relation to oral medication, inhalers, epi-pens, pre-packaged doses via injection etc.)

The insurance section have a detailed list of treatments which are covered, if you have pupils with significant medical needs contact insurance@hertfordshire.gov.uk or by phone on 01992 555480 for further advice and to ensure coverage.

Where schools are not covered by HCC's insurance they should check with their own insurers.

This school has clear guidance on the storage of medication and equipment at school.

- This school makes sure that all staff understand what constitutes an emergency for an individual child and makes sure that emergency medication/equipment, eg asthma inhalers, epi-pens etc are readily available wherever the child is in the school and on off-site activities, and are not locked away.
- In exceptional circumstances pupils in Key Stage 2 may carry their own medication/equipment, and all pupils should know exactly where to access it. Those pupils deemed component to carry their own medication/equipment with them will be identified and recorded through the pupil's IHP in agreement with parents/carers.
- Staff at this school can administer a controlled drug to a pupil once they have had specialist training.
- This school will make sure that all medication is stored safely, and that pupils with medical conditions know where they are at all times and have access to them immediately. Under no circumstances will medication be stored in first aid boxes.
- This school will only accept medication that is in date, labelled and in its original container including prescribing instructions for administration. The exception to this is insulin, which though must still be in date, will generally be supplied in an insulin injector pen or a pump.
- Parents/carers are asked to collect all medications/equipment at the end of the school term, and to provide new and in-date medication at the start of each term.
- This school disposes of needles and other sharps in line with local policies. Sharps boxes are kept securely at school and will accompany a child on off-site visits. They are collected and disposed of in line with local authority procedures.

This school has clear guidance about record keeping.

- As part of the school's admissions process and annual data collection exercise parents/carers are asked if their child has any medical conditions. These procedures also cover transitional arrangements between schools.
- This school uses an IHP to record the support an individual pupil needs around their medical condition. The IHP is developed with the pupil (where appropriate), parent/carer, designated named member of school staff, specialist nurse (where appropriate) and relevant healthcare services. Where a child has SEN but does not have a statement or EHC plan, their special educational needs are mentioned in their IHP. (See Appendix 1).
- This school has a centralised register of IHPs, and an identified member of staff has the responsibility for this register.
- IHPs are regularly reviewed, at least every year or whenever the pupil's needs change.
- The pupil (where appropriate) parents/carers, specialist nurse (where appropriate) and relevant healthcare services hold a copy of the IHP. Other school staff are made aware of and have access to the IHP for the pupils in their care.
- This school makes sure that the pupil's confidentiality is protected.
- This school seeks permission from parents/carers before sharing any medical information with any other party.
- This school keeps an accurate record of all medication administered, including the dose, time, date and supervising staff.

This school makes sure that pupils have the appropriate medication/equipment/food with them during physical activity and offsite visits.

- This school makes sure that pupils with medical conditions can participate fully in all aspects of the curriculum and enjoy the same opportunities at school as any other child, and that appropriate adjustments and extra support are provided.
- All school staff understand that frequent absences, or symptoms, such as limited concentration and frequent tiredness, may be due to a pupil's medical condition.
- This school will not penalise pupils for their attendance if their absences relate to their medical condition.
- This school will refer pupils with medical conditions who are finding it difficult to keep up educationally to the SENCO who will liaise with the pupil (where appropriate), parent/carer and the pupil's healthcare professional.
- Pupils at this school learn what to do in an emergency.
- This school makes sure that a risk assessment is carried out before any out-of-school visit. The needs of pupils with medical conditions are considered during this process and plans are put in place for any additional medication, equipment or support that may be required.

This school is aware of the common triggers that can make common medical conditions worse or can bring on an emergency. The school is actively working towards reducing or eliminating these health and safety risks and has a written schedule of reducing specific triggers to support this.

- This school is committed to identifying and reducing triggers both at school and on out-of-school visits.
- School staff have been given training and written information on medical conditions which includes avoiding/reducing exposure to common triggers.
- The IHP details an individual pupil's triggers and details how to make sure the pupil remains safe throughout the whole school day and on out-of-school activities. Risk assessments are carried out on all out-of-school activities, taking into account the needs of pupils with medical needs.
- This school reviews all medical emergencies and incidents to see how they could have been avoided, and changes school policy according to these reviews.

Each member of the school and health community knows their roles and responsibilities in maintaining and implementing an effective medical conditions policy.

- This school works in partnership with all relevant parties including the pupil (where appropriate), parent/carer, school's governing body, all school staff, employers and healthcare professionals to ensure that the policy is planned, implemented and maintained successfully.
- Key roles and responsibilities are outlined in Appendix 2.

The medical conditions policy is regularly reviewed, evaluated and updated. Updates are produced every year.

- In evaluating the policy, this school seeks feedback from key stakeholders including pupils, parents/carers, school nurses, specialist nurses and other relevant healthcare professionals, school staff, local emergency care services and governors. The views of pupils with medical conditions are central to the evaluation process.

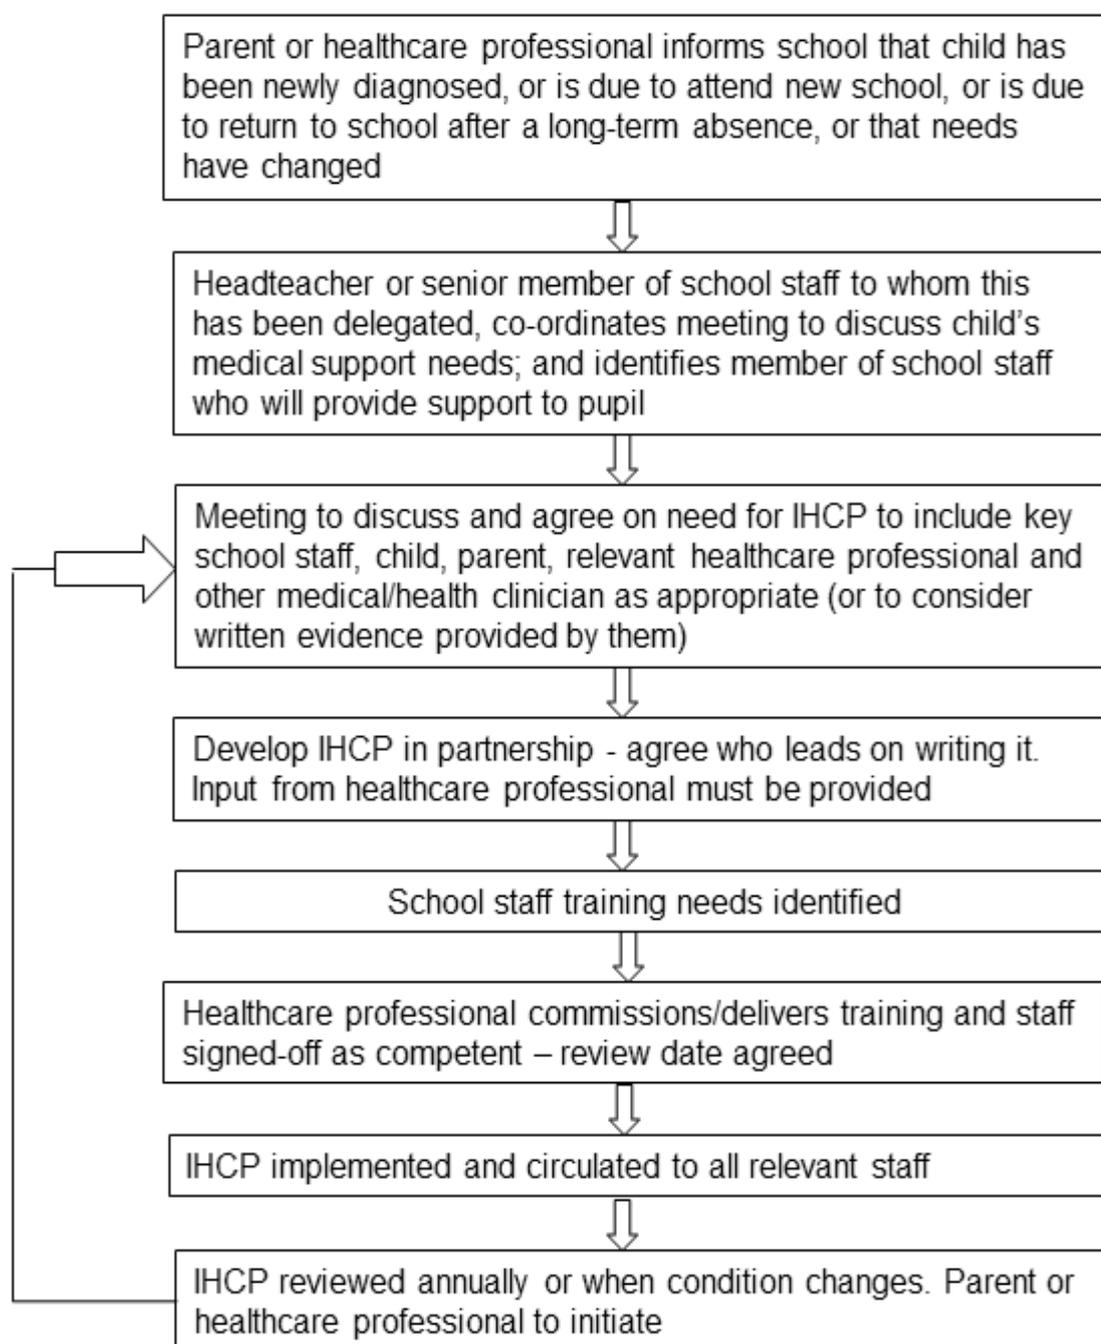

Should parents and pupils be dissatisfied with the support provided they should discuss these concerns with the SENCO.

Reviewed: October 2018

Next Review: October 2019

Appendix 1

Model process for developing individual healthcare plans

Appendix 2

Roles and responsibilities

Governing bodies – must make arrangements to support pupils with medical conditions in school, including making sure that a policy for supporting pupils with medical conditions in school is developed and implemented. They should ensure that pupils with medical conditions are supported to enable the fullest participation possible in all aspects of school life. Governing bodies should ensure that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions. They should also ensure that any members of school staff who provide support to pupils with medical conditions are able to access information and other teaching support materials as needed.

Headteacher – should ensure that their school's policy is developed and effectively implemented with partners. This includes ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation. Headteachers should ensure that all staff who need to know are aware of the child's condition. They should also ensure that sufficient trained numbers of staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations. Headteachers have overall responsibility for the development of individual healthcare plans. They should also make sure that school staff are appropriately insured and are aware that they are insured to support pupils in this way. They should contact the school nursing service in the case of any child who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse.

School staff – any member of school staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so. Although administering medicines is not part of teachers' professional duties, they should take into account the needs of pupils with medical conditions that they teach. School staff should receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions. Any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

School nurse – every school has access to school nursing services. They are responsible for notifying the school when a child has been identified as having a medical condition which will require support in school. Wherever possible, they will do this before the child starts at the school. They would not usually have an extensive role in ensuring that schools are taking appropriate steps to support children with medical conditions, but may support staff on implementing a child's individual healthcare plan and provide advice and liaison, for example on training. School nurses can liaise with lead clinicians locally on appropriate support for the child and associated staff training needs - for example, there are good models of local specialist nursing teams offering training to local school staff, hosted by a local school. Community nursing teams will also be a valuable potential resource for a school seeking advice and support in relation to children with a medical condition.

Other healthcare professionals - including GPs, paediatricians, nurse specialists/community paediatric nurses – should notify the school nurse and work jointly when a child has been identified as having a medical condition that will require support at school. They may provide advice on developing healthcare plans. Anyone dealing with the medical care of a pupil in school should contact the named school nurse for that school to ensure a coordinated approach.

Pupils – with medical conditions will often be best placed to provide information about how their condition affects them. They should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan. Other pupils will often be sensitive to the needs of those with medical conditions.

Parents/carers – should provide the school with sufficient and up-to-date information about their child's medical needs. They may in some cases be the first to notify the school that their child has a medical condition. Parents/carers are key partners and should be involved in the development and review of their child's individual healthcare plan, and may be involved in its drafting. They should carry out any action they have agreed to as part of its implementation, eg provide medicines and equipment and ensure they or another nominated adult are contactable at all times.
